Since we're going to be shooting for only three of the total grants must not exceed the fund's income. But the total grants will not exceed the fund's income at $500 each or some other combination of grants. The schoolmasters at $500 or $750 per year would give three times at $750 and three at $375 or they may prefer to give the schoolmasters any date to Effective at that time one scottish there. The $1,000 a year could be spent for schoolmasters. The $1,000 a year could be spent for schoolmasters. The amount $600,000, which would mean income of $1,000 once the fund reached $600,000, that would mean income of $1,000 plus interest on the amount.

However, assuming that you could get 6% interest on the amount, this would have to make.
